TIME OUT

THE EIGHT WONDERS OF THE CAPCOM WORLD

Introducing eight exciting video game wonders from the world of CAPCOM U.S.A.

We brought you the ever-popular games Willow, UNSquadron, Mercs and Forgotten Worlds. Had crowds coming for more with Ghouls'N Ghosts, Final Fight and Strider.

Now, CAPCOM proudly presents Magic Sword. An action-packed video game that's sure to bring you even greater turnouts.

Thanks to our exclusive Super Chip, Magic Sword gives you high resolution graphics that make these characters come to life.

Players will really fight for their lives in battles w evil Drokmar, a creature spellbound by the Blac Orb. Their mission? To destroy his army of demons and restore freedom to the kingdom.

What's more, Magic Sword has 50 playing levels conquer, plus a special feature that lets players choo between two different endings. You'll reap fantastic treasures from your coinbox, month after month.

The Future Rides On This Flight.

A flash of hope fills the sky as RAI DEN thunders into combat against the aliens. It's all or nothing in this exciting fight in flight for Earth's survival!

- ▲ Challenging one or simultaneous two-player action
- ▲ Excitement builds through eight stages of combat to the final confrontation against the alien command battleship
- ▲ Hidden power-up items increase fighting power and arsenal with more bullets, lasers, missiles and bombs
- ▲ Intense graphics and special effects engage players in the action
- ▲ Second player buy-in at any time
- ▲ Game continuation mode

Watch your earnings take off as RAI DEN flies into the final showdown.

FABTEK

The Fruit Of Man's Intelligence, CYBER-LIP Is Suddenly Out Of Control.

Up until now, mankind has enjoyed their prosperity. Now they are facing trouble. CYBER-LIP, the state of the art army computer, is out of control. The cyborgs and aliens under its control are beginning to attack people. The government calls in Rick and Brooks to destroy CYBER-LIP.

The peope trust Rick and Brooks with their future.

The president sends a message to the heroes.

Attack the colony. Do you want to go UP or DOWN?

Fight the bosses at each stage.

Use various weapons and clear the area of danger.

New Zealand $1 and $2 Coins
These coins are expected to be realised into the New Zealand market before the end of this year.
In Australia operators who positioned themselves to take advantage of he new coinage there experienced increases in income of up to 20%.
We should also be looking to take advantage of these coins to offset the effect the new instant $2 Kiwi (to be released in November) and other cost increases.
Electronic coin mech's are now available - these will accept all current coins and can be reprogrammed to accept $1 and $2 coins.

* All prices quoted on a cash basis
* Freight extra unless specified inclusive
* All PCB's can be provided with Control panels if required
* We accept visa and bankcard (special rates apply).

COMMENTS

NEO-GEO PREVIEW:

Thanks to all the operators that attended the three previews and for the interest shown in this new product.

A SURE THING:

When a certain Nelson coin machine operator/horse owner travels all the way to Christchurch to watch his horse run its first race for twelve months and honestly advises you not to back it - expect it to win and pay $26 (tax free).

STREET KIDS:

Becoming a real problem throughout N/Z especially with this latest development where if they are underage the police can do very little to assist operators, except detain the offender for a couple of hours. We have had one offender picked up twice in the same day for the same offence.

PINBALL RECOVERED:

Nice to see that two Auckland operators working together can recover a stolen pinball machine to it's rightful owner. This would also be the case with stolen PCB's if the buyer was more concerned about the source of the product rather that the "Great Deal" he was being offered.

OVERSEAS SHOWS:

The Japanese show (Jamma) runs October 3 and 4 and operators can expect numbers of new product to be available after this show.
American show: Runs October 24/25/26 - Generally a few surprises/new product at this show as well.

TEST REPORTS:

In both Australia and the huge USA market the Neo-Geo Sytem is now sitting in second place. Given the new games to be released this is excellent for the future.

TURTLE TROUBLE

During September, a Wellington arcade was found to be using a TMNT board which infringed copyright. The operator (who had previously been warned about Coin Cascade's exclusive NZ rights in TMNT) was approached by Coin Cascade's solicitor and the infringing board was surrendered.

As well as loosing his board, this operator made himself liable to a high court claim for:

- an injunction restraining him from using infringing boards in the future.
- the total income derived by the operator from use of the infringing board.
- exemplary damages for importing and using the board when he knew it infringed copyright.
- Coin Cascades legal costs.

NEO·GEO

TECHNICAL FEATURES

Fast 16 Bit Main Microprocessor
Allows game software to be executed up to four times faster than conventional video game hardware.

Expanded ROM Capacity
Up to 64 Megabytes of GAME ROM storage, allows for superior graphics and sounds, makes ordinary video games containing less than 10 Megabytes of GAME ROM look and sound weak by comparison!

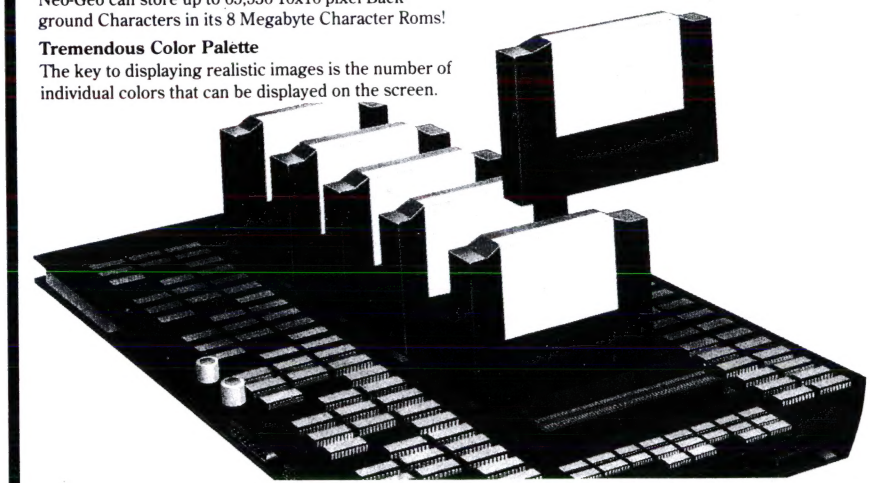
Incredible Sprite Generation
Sprites are groups of Pixels (screen dots) that can be moved around on the screen. They are used for displaying animated objects, such as the Main Characters. Typical coin-op game hardware can display less than 80 sprites on the screen. Neo-Geo can display and manipulate 380 Sprites simultaneously! Neo-Geo also has a unique hardware feature for enlarging and reducing Sprites smoothly!

Maximum Background Video
Neo-Geo's advanced hardware can display and independently scroll 3 unique Background Video scenes. This allows Neo-Geo to create realistic 3D effects! Neo-Geo can store up to 65,536 16x16 pixel Background Characters in its 8 Megabyte Character Roms!

Tremendous Color Palette
The key to displaying realistic images is the number of individual colors that can be displayed on the screen. Typical coin-op hardware can display from 64 to 512 different colors at the same time, Neo-Geo can display 4096 colors from a selection of 65,536 total colors! This allows the capability to display photo-quality graphics on a standard resolution monitor!

Compact Disk Quality Sound
3 channels of Programmable Sound Generation (PSG), 7 channels of Pulse Control Modulation (PCM), 2 channels of Frequency Modulation (FM), and a channel of Noise generation, combined with true Stereophonic Audio Output, allows Neo-Geo to deliver incredible, true to life audio effects. Each Neo-Geo system comes with a pair of Personal Stereo Headphone jacks on the front of the Control Panel for the ultimate in player enjoyment!

Advanced Hardware Test Program
The Neo-Geo hardware can diagnose potential hardware problems, such as a Rom or Ram failure, using its built-in Test Mode Program. The Main Volume control and Headphone Volume control can be easily accessed through the Control Panel.



Neo-Geo 20" with four games capacity and electronic coin mechanism

Cabinet with Mother PCB - $4700+GST

New Game PCB's - $760+GST

These products are marketed in New Zealand under an exclusive distribution licence held by Coin Cascade Ltd.

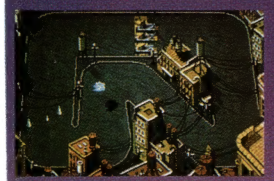
FIRST UNIVERSAL DRIVING GAME KIT EVER!

BADLANDS™



The city—watch out for falling power lines and the falling water tower.

The desert—the mountain will crumble and fall onto the track.

The refinery—be carefull of creating oil spills.

Custom car options include missiles, tires, turbo, speed, and shields.

It has been 50 years since the nuclear disaster. The sport of sprint racing is now a ruthless battle between armed cars. These races take place on tracks built in the ruins of the dangerous nuclear zone known only as the BADLANDS.

This is sprint racing gone BAD! It's all-out war on the track as players blast away at the drones (and each other) to finish first! Players shoot playfield targets for extra points and bonus missiles!

One or two players can race at any time with Badlands' buy-in and game continuation features. If a player loses to one of the drone cars, he can put in another coin to continue on to the next heat and retain any custom car options he has acquired.

Badlands has eight unique track layouts set in eight different animated backgrounds that react to player shots and crashes. These tracks change as the level of difficulty increases.

COMPLETE 26" CABINET WITH TWO PLAYER BADLANDS DRIVING GAME

$5650 + GST

In Final Fight,™ They're Serving Cocktails. Molotov Cocktails.

Those creeps! The Mad Gear Gang has kidnapped Haggar's daughter, Jessica. Now, you must head to the streets for the Final Fight. Use your fists and feet, as well as knives and Molotov Cocktails to beat the gang. Trust no one. Even the cops have gone bad!

Players will welcome the return of Haggar, the original Street Fighter

Two-player interactive

Spectacular graphics, thanks to Capcom's CPS super chip

Final Fight has "the cool Factor." Players will love the non-stop action!

NEO - GEO DISPLAY NEW ZEALAND

Neo-Geo Display-New Zealand

Over three days in August approx. 160 New Zealand operators attended three Neo-Geo previews throughout the country to view one company's views on operating in the 1990's.
Eddy Cochrane (export manager Leisure and Allied industries), Gary Walker (Coin Cascade Ltd), Maarten Boogert (Auckland Coin), David Boogert (Wizard Coin) and Robert Briggs (Merlin Amusements) presented an hour long display which included a twenty minute video presentation on the new Neo-Geo system. Operators were then free to inspect the display machines and talk individually with the presenters about the product while enjoying a drink and some lite refreshments.

Neo-Geo Response

Most of the operators attending were highly impressed with the quality of the games presented on the Neo-Geo system.
Game One: Baseball - Although intended mainly for the American market this game drew quite a bit of interest and in the three test locations presently operating in New Zealand (Auckland, Rotorua and Christchurch) seems to be attracting a solid following.
Game Two: Golf - Some operators found this game difficult but it contains a large number of features that will insure long earnings. This is probably the least likely game to sell in N/Z.
Game Three: Nam 75 - An excellent combat style game with huge player appeal and earning potential.
If this PCB had been released in dedicated format you would expect to pay between $1700 - $2000 instead of the $760 presently being asked.
Game Four: Magician Lord - A top class magician style game with top earning potential. This PCB had it been in dedicated format is another that would have retailed in the $1600 - $1800 range.
Game Five; Ninja Combat - The best game in a quality field. This is a top Ninja game with incredible memory and player appeal. This is the only Ninja game we have seen actually outearning Final Fight. If SNK had decided to release this unit in dedicated format (ie: as a tradition PCB) operators would have been happy to pay $2000 for this unit. The Neo-Geo price - $760.
Game Six: Super Spy - This game was only on view for the Christchurch presentation as it did not arrive in time to show at the earlier two previews. A spy game with a different approach and a solid performer.
Game Seven: Riding Hero - A hang on type motorcycle racing game that is capable of being linked together with another cabinet to allow a linked game system. Top quality action. Neo-Geo price $760

Maarten Boogert - Auckland Neo Geo Preview

Eddy Cochrane - Auckland Neo-Geo Preview

After reviewing the games on display a number of operators ordered full Neo-Geo games taking advantage of the special offer available to those that attended and ordered units at the previews.
Coin Cascade and Liesure and Allied were very happy with both the National attendance and sales achieved at these previews. This was the first time that operators had attended a presentation of this type in New Zealand and from the results achieved Coin Cascade intends to repeat this procedure again with any new product that is clearly a market leader and which will clearly determine future trends in this business.

Neo-Geo will be around in ten years - Will your company?
